

Welcome to GameStat

Baseball. Apps. Analytics.

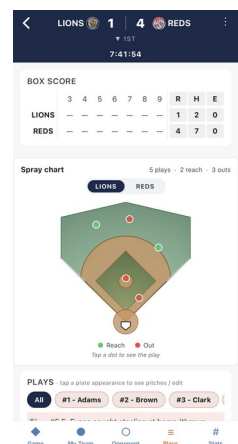

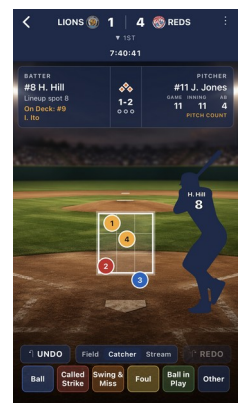

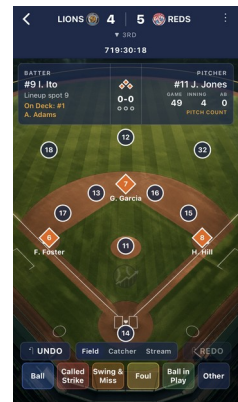

Thank you for being an Early Supporter of GameStat! We aspire to offer improved experience for fans, coaches, and administrators while maintaining privacy . . . at a reasonable price. Here's a summary of what we offer:

Your data is your data

- **You own your team's information.** Rosters, games, and stats belong to your team — we're just the scoreboard.
- **Edit anything, anytime.** Fix plays, stats, and rosters — coaches stay in control.
- **Export your stats.** Download your season stats anytime from the team page.
- **Never sold. No ads.** We don't sell your data or your kids' data, and we don't run ads.

Built for game day

- **Undo and redo.** Mistakes happen mid-game — correct any pitch or play with a tap.
- **A live view worth watching.** Ball flight, player names on the field, and pitch-by-pitch updates — fans follow the game in real time, not just the score. More insight into pitch location — including when hit-by-pitch — and pauses such as mound visits. Field View and Catcher View — simply tap or swipe to switch between views.
- **Make it yours.** Team colors and logos, nicknames for the teams you follow, and your league's logo displayed on the field.
- **Sponsor showcase.** Give the local businesses that support your season visibility at every game. Tap their logo to explore their business.
- **Season stats, automatically.** Every game rolls up into batting, pitching, and fielding stats for the season — and players earn badges for their milestones along the way.

See your Early Supporter badge in the app when you sign up!

Early Supporter perks

- **Your launch price, locked.** Keep today's price for as long as your subscription stays active — future increases won't apply to early supporters.
- **A direct line to the builders.** Your feedback shapes the app. Tell us everything: support@2seamlabs.com

Coming Soon — League Management

- Manage your divisions, rules, sponsors, and announcements.
